

Dreamcatchers Empowerment Network is a non-profit agency providing assessments, job preparation, job placement and coaching to youth and adults with limitations and disabilities.

Dreamcatchers Empowerment Network helps clients explore their dreams of becoming employed and self-sufficient through programs in Butte, Contra Costa, Placer, Sacramento, Solano and Yolo counties. We work in cooperation with local businesses, organizations and agencies to help our clients become permanently employed within the community.

Services To Clients And Local Businesses

We assess our clients' employment strengths and weaknesses within a supportive and controlled environment; measure basic work skills, behaviors and interpersonal skills in a simulated environment; and provide specific training and tools in order to make them employable in the competitive marketplace.

Dreamcatchers educates the communities in which it operates, helping to erase the stigma associated with mental and physical health issues and demonstrating that when given the proper support, clients can lead productive lives in their local communities.

Employer Incentives

Dreamcatchers works with a wide variety of local employers and agencies to place our clients in real work environments.

We cover clients' salaries and workers' compensation insurance for an agreed number of hours. Job coaches ensure work safety, quality and quantity of work. Employers have the opportunity to experience the clients capabilities during this internship with the possibility of long-term employees after this experience.

Tax credits are available for businesses, as well as the possibility of On-The-Job training funds to off-set the employees salary.

“Dreamcatchers helps clients fulfill their hopes and dreams.”

Dreamcatchers helps clients explore vocations in cooperation with local businesses. We provide specific job training and education, transportation, clothing training, and behavior adjustment training in order to make our clients employable in a competitive marketplace.
